

NEXTMED

ABOUT US

At Nextmed, we are committed to providing innovative and reliable healthcare solutions that prioritize quality, safety, and accessibility. As a trusted distributor of high-quality medical products, we cater to the diverse needs of healthcare providers, diagnostic centers, laboratories, and individuals.

OUR EXPERTISE

Nextmed specializes in a wide range of Rapid Diagnostic Tests while also supplying essential medical consumables to support healthcare providers.

OUR MISSION

At Nextmed, our mission is to empower healthcare professionals and individuals with high-quality, reliable, and affordable medical products. By prioritizing safety, innovation, and accessibility, we aim to enhance the delivery of healthcare and promote healthier communities.

OUR VISION

We envision becoming a leading medical distribution company, known for our commitment to excellence, innovation, and customer satisfaction. Our goal is to be a trusted partner in improving global health outcomes.

WHY CHOOSE NEXTMED

COMPREHENSIVE PRODUCT PORTFOLIO

From diagnostic tests to medical consumables, we provide everything healthcare providers need in one place.

COMMITMENT TO QUALITY

All our products meet international standards for safety and performance.

CUSTOMER-CENTRIC APPROACH

We strive to build strong relationships by understanding and meeting our customers' unique needs.

RELIABLE DISTRIBUTION

With an efficient supply chain, we ensure timely delivery of products to support your operations seamlessly.

WHO WE SERVE

Nextmed caters to a broad spectrum of clients, including hospitals, clinics, pharmacies, laboratories, occupational health services, rehabilitation centers, law enforcement agencies, schools and individuals seeking health solutions.

At Nextmed, we believe that reliable medical products save lives, and we are proud to be your trusted partner in healthcare innovation. Together, let's create a healthier tomorrow.

CONTACT US

To learn more about our products or services, feel free to get in touch. We're here to assist you in meeting your healthcare needs.

5 PANEL DRUG TEST DIP CARD

(OPI, THC, COC, MET, AMP)

The **Nextmed 5 Panel Drug Test Dip Card**

is a fast, reliable, and easy-to-use urine screening test designed to detect the presence of five commonly abused substances.

It provides quick results within minutes, making it ideal for workplace testing, clinical use, rehabilitation centers, and home testing.

KEY FEATURES:

- ✗ **Fast & Accurate:** Results in 5 minutes with up to 99% accuracy.
- ✗ **Easy to Use:** Simply dip the test panel into a urine sample and wait for results.
- ✗ **Clear Results:** Two lines indicate a negative result, while one line in the test region indicates a positive result.
- ✗ **FDA & CLIA Waived:** Meets industry standards for professional and home testing.
- ✗ **Long Shelf Life:** Reliable storage and use for extended periods.

Test	Calibrator	Cut-off	Example
OPI (Opiates)	MorphineD-Amphetamine	2000ng/mL	Heroin, Codeine
THC (Tetrahydrocannabinol)	11-nor- Δ^9 -THC-9 COOH	50ng/mL	Marijuana/Cannabis
COC (Cocaine)	Benzoyllecgonine	300ng/mL	Crack, Cocaine
MET (Methamphetamine)	D-Methamphetamine	1000ng/mL	Tik
AMP (Amphetamines)	D-Amphetamine	1000ng/mL	Speed

6 PANEL DRUG TEST DIP CARD

(OPI, THC, MQL, COC, MET, AMP)

The **Nextmed 6 Panel Drug Test Dip Card** is a rapid and accurate urine drug screening test that detects six commonly abused substances. This easy-to-use test provides fast results within minutes, making it ideal for workplace testing, rehabilitation centers, clinical settings, and home use.

KEY FEATURES:

- Rapid Results:** Get results within 5 minutes with up to 99% accuracy.
- Easy Testing Process:** Dip the test panel into a urine sample and wait for clear, reliable results.
- Simple Interpretation:** Two lines indicate a negative result, while one line in the test region indicates a positive result.
- FDA & CLIA Waived:** Meets professional and regulatory standards.
- Long Shelf Life:** Durable and reliable for extended storage.

Test	Calibrator	Cut-off	Example
OPI (Opiates)	MorphineD-Amphetamine	2000ng/mL	Heroin, Codeine
THC (Tetrahydrocannabinol)	11-nor-Δ9-THC-9 COOH	50ng/mL	Marijuana/Cannabis
COC (Cocaine)	Benzoylecgonine	300ng/mL	Crack, Cocaine
MET (Methamphetamine)	D-Methamphetamine	1000ng/mL	Tik
AMP (Amphetamines)	D-Amphetamine	1000ng/mL	Speed
MQL (Methaqualone)	Methaqualone	300ng/mL	Mandrax

8 PANEL DRUG TEST DIP CARD

(OPI, THC, COC, MET, AMP, BZO, MDMA, MTD)

The **Nextmed 8 Panel Drug Test Dip Card** is a fast, reliable, and easy-to-use urine screening test designed to detect eight commonly abused substances. It delivers rapid results within minutes, making it an ideal choice for workplace testing, clinical use, rehabilitation centers, law enforcement, and home drug testing.

KEY FEATURES:

- Fast & Accurate:** Results within 5 minutes with up to 99% accuracy.
- Easy to Use:** Simply dip the test panel into a urine sample and wait for results.
- Clear Interpretation:** Two lines indicate a negative result, while one line in the test region indicates a positive result.
- FDA & CLIA Waived:** Meets industry standards for professional and home testing.
- Long Shelf Life:** Reliable storage and use for extended periods.

Test	Calibrator	Cut-off	Example
OPI (Opiates)	MorphineD-Amphetamine	2000ng/mL	Heroin, Codeine
THC (Tetrahydrocannabinol)	11-nor-Δ9-THC-9 COOH	50ng/mL	Marijuane/Cannabis
COC (Cocaine)	Benzoylcegonine	300ng/mL	Crack, Cocaine
MET (Methamphetamine)	D-Methamphetamine	1000ng/mL	Tik
AMP (Amphetamines)	D-Amphetamine	1000ng/mL	Speed
BZO (Benzodiazepines)	Oxazepam	300ng/mL	Xanax/Valium
MDMA	D, L-Methylenedioxy methamphetamine	500ng/mL	Ecstasy/Molly
MTD (Methadone)	Methadone	300ng/mL	Medication used for opioid addiction treatment

9 PANEL DRUG TEST DIP CARD

(OPI, THC, COC, MET, AMP, BZO, MDMA, MTD, ETG)

The **Nextmed 9 Panel Drug Test Dip Card** is a fast, reliable, and easy-to-use urine screening test designed to detect multiple substances simultaneously, including ethyl glucuronide (ETG), a key alcohol metabolite. It delivers rapid results within minutes, making it an ideal choice for workplace testing, clinical use, rehabilitation centers, law enforcement, and home drug testing.

KEY FEATURES:

- ✗ **Fast & Accurate:** Results within 5 minutes with up to 99% accuracy.
- ✗ **Easy to Use:** Simply dip the test panel into a urine sample and wait for results.
- ✗ **Clear Interpretation:** Two lines indicate a negative result, while one line in the test region indicates a positive result.
- ✗ **FDA & CLIA Waived:** Meets industry standards for professional and home testing.
- ✗ **Long Shelf Life:** Reliable storage and use for extended periods.

Test	Calibrator	Cut-off	Example
OPI (Opiates)	MorphineD-Amphetamine	2000ng/mL	Heroin, Codeine
THC (Tetrahydrocannabinol)	11-nor-Δ9-THC-9 COOH	50ng/mL	Marijuana/Cannabis
COC (Cocaine)	Benzoyllecgonine	300ng/mL	Crack, Cocaine
MET (Methamphetamine)	D-Methamphetamine	1000ng/mL	Tik
AMP (Amphetamines)	D-Amphetamine	1000ng/mL	Speed
BZO (Benzodiazepines)	Oxazepam	300ng/mL	Xanax/Valium
MDMA	D, L-Methylenedioxy methamphetamine	500ng/mL	Ecstasy/Molly
MTD (Methadone)	Methadone	300ng/mL	Medication used for opioid addiction treatment
ETG (Ethyl Glucuronide)	Ethyl Glucuronide	500ng/mL	Alcohol

6 PANEL URINE DRUG TEST CUP

(THC, COC, BZO, OPI, AMP, MET)

The **Nextmed 6 Panel Urine Drug Test Cup** is a reliable, easy-to-use screening tool designed for detecting six commonly abused drugs in urine samples. With built-in adulteration detection and tamper-proof design, this test cup is ideal for workplace testing, rehabilitation centers, clinical use, law enforcement, and home testing.

KEY FEATURES:

- ✗ **Fast & Accurate:** Provides results within 5 minutes with up to 99% accuracy.
- ✗ **All-in-One Cup Design:** No dipping or handling of test strips required.
- ✗ **Built-in Temperature Strip:** Helps ensure sample integrity.
- ✗ **Tamper-Resistant:** Leak-proof, secure lid prevents contamination or adulteration.
- ✗ **Simple Interpretation:** Two lines indicate a negative result, while one line in the test region indicates a positive result.
- ✗ **FDA & CLIA Waived:** Meets industry standards for professional and home testing.

Test	Calibrator	Cut-off	Example
OPI (Opiates)	MorphineD-Amphetamine	2000ng/mL	Heroin, Codeine
THC (Tetrahydrocannabinol)	11-nor-Δ9-THC-9 COOH	50ng/mL	Marijuana/Cannabis
COC (Cocaine)	Benzoylecgonine	300ng/mL	Crack, Cocaine
MET (Methamphetamine)	D-Methamphetamine	1000ng/mL	Tik
AMP (Amphetamines)	D-Amphetamine	1000ng/mL	Speed
BZO (Benzodiazepines)	Oxazepam	300ng/mL	Xanax, Valium

7 PANEL SPLIT KEY URINE DRUG TEST CUP

(OPI, THC, COC, MET, AMP, BZO, MDMA + 3 Adulterants: OXI, SG, PH)

The **Nextmed 7 Panel Split Key Urine Drug Test Cup** is a high-quality, tamper-resistant screening tool designed to detect seven commonly abused drugs along with three adulteration tests for sample integrity. The split-key design ensures a secure and hygienic testing process, making it ideal for workplace testing, rehabilitation centers, law enforcement, clinical use, and home drug screening.

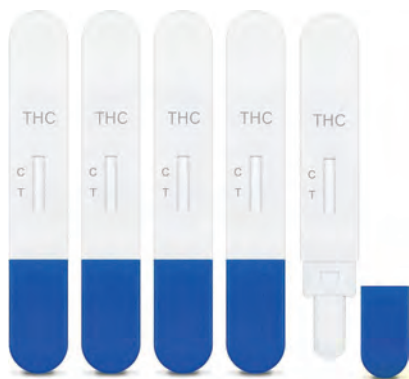

KEY FEATURES:

- ✗ **Fast & Accurate:** Provides results in 5 minutes with up to 99% accuracy.
- ✗ **Split Key Design:** Allows activation of the test only when ready, ensuring accuracy and hygiene.
- ✗ **Leak-Proof & Tamper-Resistant:** Secure lid prevents spills and contamination.
- ✗ **Easy-to-Read Results:** Two lines indicate a negative result, while one line in the test region indicates a positive result.
- ✗ **FDA & CLIA Waived:** Meets professional and regulatory standards.
- ✗ **Built-in Adulteration Detection:** Ensures sample integrity by identifying possible tampering.

Test	Calibrator	Cut-off	Example
OPI (Opiates)	MorphineD-Amphetamine	2000ng/mL	Heroin, Codeine
THC (Tetrahydrocannabinol)	11-nor-Δ9-THC-9 COOH	50ng/mL	Marijuana/Cannabis
COC (Cocaine)	Benzoyllecgonine	300ng/mL	Crack, Cocaine
MET (Methamphetamine)	D-Methamphetamine	1000ng/mL	Tik
AMP (Amphetamines)	D-Amphetamine	1000ng/mL	Speed
BZO (Benzodiazepines)	Oxazepam	300ng/mL	Xanax/Valium
MDMA	D, L-Methylenedioxy methamphetamine	500ng/mL	Ecstasy/Molly

THC SALIVA TEST CASSETTE

The **Nextmed THC Saliva Test Cassette** is a rapid, non-invasive drug screening tool designed to detect the presence of Tetrahydrocannabinol (THC) in oral fluids. This easy-to-use test provides fast and reliable results within minutes, making it ideal for workplace testing, roadside screening, rehabilitation centers, law enforcement, and home use.

KEY FEATURES:

- ✗ **Detects THC Use:** Screens for recent marijuana consumption through saliva.
- ✗ **Fast & Accurate Results:** Provides results within 5–10 minutes with high accuracy.
- ✗ **Non-Invasive & Easy to Use:** No urine or blood sample required, just a simple saliva swab.
- ✗ **Clear & Reliable Interpretation:**
 - Two lines indicate a negative result (no THC detected).
 - One line in the test region indicates a positive result (THC detected).
- ✗ **Recent Use Detection:** Effective for detecting THC within minutes to hours after use.
- ✗ **Tamper-Resistant:** Reduces the risk of sample adulteration compared to urine tests.
- ✗ **Portable & Convenient:** Ideal for on-the-spot drug screening in various environments.
- ✗ **FDA & CLIA Waived:** Meets industry standards for professional and home testing.

The Nextmed THC Saliva Test Cassette is a reliable and efficient solution for detecting recent marijuana use, ensuring compliance and safety in different testing scenarios.

6 PANEL SALIVA DRUG TEST CASSETTE

(MET, COC, THC, AMP, OPI, PCP)

The **Nextmed 6 Panel Saliva Drug Test Cassette** is a rapid, non-invasive screening tool designed to detect six commonly abused drugs in oral fluids. It provides fast and reliable results within minutes, making it an ideal choice for workplace testing, roadside screenings, rehabilitation centers, law enforcement, and home drug testing.

TESTED SUBSTANCES:

MET (Methamphetamine): Detects methamphetamine and related stimulants.

COC (Cocaine): Screens for cocaine and its metabolites.

THC (Tetrahydrocannabinol): Identifies marijuana use.

AMP (Amphetamines): Includes stimulant drugs like Adderall and speed.

OPI (Opiates): Detects heroin, morphine, and codeine.

PCP (Phencyclidine/Angel Dust): Screens for hallucinogenic dissociative drugs.

KEY FEATURES:

- Fast & Accurate Results:** Provides results in 5–10 minutes with up to 99% accuracy.
- Non-Invasive & Easy to Use:** No need for urine or blood samples, just a simple saliva swab.
- Recent Use Detection:** Effective for detecting drug use within minutes to hours after consumption.
- Tamper-Resistant:** Reduces the risk of adulteration compared to urine tests.

ETG CASSETTE

(URINE)

The **ETG (Ethyl Glucuronide) Cassette Urine Test** is a rapid and reliable screening tool designed to detect the presence of ethyl glucuronide, a direct metabolite of alcohol, in urine samples.

KEY FEATURES:

- ✗ **Highly Sensitive:** Detects alcohol consumption up to 36 hours after intake.
- ✗ **Fast Results:** Provides accurate results within 5 minutes.
- ✗ **Easy-to-Use:** Simple procedure requiring only a urine sample.
- ✗ **Reliable Screening:** Helps monitor alcohol abstinence and detect recent alcohol use.
- ✗ **Single-Use & Disposable:** Ensures hygiene and prevents cross-contamination.

APPLICATIONS:

Workplace Testing: Used by employers for alcohol screening.

Rehabilitation & Recovery Programs: Helps monitor sobriety in alcohol treatment programs.

Law Enforcement & Probation: Supports legal and probationary alcohol monitoring.

Personal Use: Ideal for individuals tracking alcohol consumption.

The ETG Cassette (Urine Test) is a highly effective tool for detecting recent alcohol intake, making it essential for monitoring and enforcing alcohol-free environments.

DISPOSABLE ALCOHOL TESTER

The **Disposable Alcohol Tester** is a single-use device designed to quickly and accurately measure the level of alcohol (specifically blood alcohol concentration, or BAC) in a person's breath. It is commonly used for screening purposes, including personal use, workplace testing, and traffic law enforcement. The tester provides immediate results, making it convenient for situations that require rapid alcohol detection.

KEY FEATURES :

- ✗ **Fast Results:** Provides results in seconds, making it ideal for on-the-spot testing.
- ✗ **Easy to Use:** No special training required; simply blow into the tester and read the result.
- ✗ **Disposable:** Single-use, hygienic, and convenient for quick alcohol testing without the need for reusability.
- ✗ **Portable:** Compact and lightweight, easy to carry for on-the-go testing.
- ✗ **Accurate:** Provides reliable alcohol readings, suitable for basic alcohol screening.
- ✗ **Non-invasive:** Measures alcohol content in breath without the need for blood or urine samples.

IDEAL FOR:

**Personal Use | Workplace Testing | Law Enforcement |
Event & Venue Monitoring | Travel & Transportation**

The Disposable Alcohol Tester offers a simple, fast, and non-invasive solution for alcohol detection, providing peace of mind and ensuring safety in environments where alcohol levels need to be monitored.

COTININE/NICOTINE/VAPE TEST CASSETTE

(Urine)

The **Cotinine/Nicotine/Vape Test Cassette (Urine)** is a rapid diagnostic test used to detect the presence of cotinine, a metabolite of nicotine, in a urine sample. This test is primarily used to determine if an individual has recently used tobacco or nicotine products, such as cigarettes, cigars, vapes or smokeless tobacco. The test provides a quick and accurate result to assess nicotine exposure.

KEY FEATURES:

- ✗ **Accurate Detection:** Specifically detects cotinine, which is a breakdown product of nicotine and stays in the body longer than nicotine itself, providing an accurate indication of tobacco use.
- ✗ **Quick Results:** Provides results in 5-10 minutes, allowing for fast assessment.
- ✗ **High Sensitivity & Specificity:** Highly sensitive to cotinine and nicotine, reducing the risk of false positives or negatives.
- ✗ **Easy to Use:** Simple, one-step procedure that requires minimal training, making it suitable for both healthcare providers and home testing.
- ✗ **Small Sample Size:** Requires only a small urine sample.
- ✗ **Portable & Convenient:** Ideal for point-of-care settings, home use, or workplace screening for nicotine use.
- ✗ **FDA Approved:** Meets regulatory standards for reliable results.

IDEAL FOR:

**Tobacco Use Screening | Nicotine Exposure Monitoring |
Healthcare Providers | Home Use**

URINALYSIS REAGENT STRIPS

(10PA)

The **Urinalysis Reagent Strips (10PA)** are diagnostic tools used to perform a quick and accurate analysis of a urine sample to detect a variety of substances, including metabolic byproducts, nutrients, and specific chemical markers. These strips are essential for monitoring and diagnosing various conditions such as diabetes, kidney disease, urinary tract infections (UTIs), and metabolic disorders. The 10PA refers to a 10-parameter reagent strip, which can analyze multiple urine components simultaneously.

KEY FEATURES:

- ✗ **Comprehensive Testing:** Provides simultaneous testing for 10 different parameters in one strip.
- ✗ **Easy to Use:** Simple to use with minimal preparation, making it suitable for both clinical and point-of-care testing.
- ✗ **Quick Results:** Offers results within a few minutes (typically within 60 seconds to 2 minutes, depending on the parameter).
- ✗ **High Sensitivity & Accuracy:** The strips are designed to provide reliable and precise results for the detection of various substances in urine.
- ✗ **Color-Coded Results:** The test strips are color-coded for easy visual interpretation of results, with a chart provided to compare the test strip colors to known values.
- ✗ **Non-Invasive Testing:** Requires a small urine sample, making it a simple and non-invasive method for monitoring health.

PARAMETERS TESTED:

**pH | Protein | Glucose | Ketones | Specific Gravity | Bilirubin |
Urobilinogen | Blood (Hemoglobin) | Nitrite | Leukocyte Esterase**

ON CALL® PLUS BLOOD GLUCOSE METER

The **On Call® Plus Blood Glucose Meter** is a reliable, easy-to-use, and accurate blood glucose monitoring system designed for home and professional use. It provides fast and precise results, helping individuals manage their diabetes effectively.

KEY FEATURES:

- ✗ **Fast & Accurate Results:** Delivers blood glucose readings in 10 seconds with high accuracy.
- ✗ **Small Sample Size:** Requires only 1 µL of blood, reducing discomfort during testing.
- ✗ **Large LCD Display:** Easy-to-read screen with clear numbers for better visibility.
- ✗ **Memory Storage:** Stores up to 300 test results with date and time for easy tracking.
- ✗ **Automatic Coding:** Ensures precise readings without manual calibration.
- ✗ **User-Friendly Design:** Simple one-button operation for quick testing.
- ✗ **Alternate Site Testing:** Can use blood samples from the fingertip, palm, or forearm.
- ✗ **Long Battery Life:** Supports up to 1,000 tests with a single battery.
- ✗ **Strip Ejection Button:** Allows for hygienic disposal of used test strips.

IDEAL FOR:

Diabetes Management at home
Clinics & Healthcare Facilities
Caregivers & Elderly Patients

The On Call® Plus Blood Glucose Meter is a trusted and effective tool for monitoring blood sugar levels, ensuring convenient and accurate diabetes management.

MISSION® ULTRA HEMOGLOBIN TESTING SYSTEM

The **Mission® Ultra Hemoglobin Testing System** is a compact, accurate, and easy-to-use device designed to quickly measure hemoglobin (Hb) levels in blood. This system is ideal for individuals and healthcare professionals looking for a reliable tool to monitor hemoglobin levels and assess anemia or other blood conditions.

KEY FEATURES:

- ✗ **Fast & Accurate Results:** Provides precise hemoglobin readings in as little as 12 seconds.
- ✗ **Small Blood Sample:** Requires only a small blood drop (4 µL), minimizing discomfort.
- ✗ **Easy-to-Use:** Simple operation with minimal steps for quick testing.
- ✗ **Large LCD Display:** Clear and easy-to-read screen for fast interpretation of results.
- ✗ **Portable & Convenient:** Lightweight and ideal for both home use and clinical settings.
- ✗ **Memory Storage:** Stores up to 500 test results with date and time for easy tracking of hemoglobin levels.
- ✗ **Auto-Off Function:** Saves battery life with automatic shutdown after use.
- ✗ **Affordable:** Provides professional-quality hemoglobin testing at an affordable price.

IDEAL FOR:

Monitoring Hemoglobin Levels in individuals with anemia or other blood disorders

Home Use for self-monitoring of hemoglobin levels

Healthcare Professionals conducting quick hemoglobin screenings

Clinics & Wellness Centers for routine checkups and health assessments

The Mission® Ultra Hemoglobin Testing System is a reliable and efficient solution for monitoring hemoglobin levels, helping users manage their health and detect early signs of anemia or other related conditions.

MISSION® ULTRA CHOLESTEROL MONITORING SYSTEM

The **Mission® Ultra Cholesterol Monitoring System** is a fast, reliable, and easy-to-use device designed for Total Cholesterol (TC) testing. It provides accurate results, making it ideal for home use, healthcare professionals, and wellness screenings.

KEY FEATURES:

- ✗ **Measures Total Cholesterol (TC)**
- ✗ **Fast & Accurate Results:** Provides results in 30 seconds.
- ✗ **Small Blood Sample Requirement:** Requires only 4 µL of blood, minimizing discomfort.
- ✗ **Large LCD Display:** Easy-to-read screen with clear test results.
- ✗ **Memory Storage:** Stores up to 200 test results with date and time for tracking progress.
- ✗ **User-Friendly Design:** Simple operation with minimal steps for quick testing.
- ✗ **Portable & Battery-Operated:** Lightweight and convenient for home and professional use.

IDEAL FOR:

Personal Cholesterol Monitoring
Healthcare Professionals & Clinics
Wellness & Preventive Screenings

The Mission® Ultra Cholesterol Monitoring System is a trusted and efficient solution for monitoring Total Cholesterol (TC) levels, promoting heart health and early risk detection for cardiovascular diseases.

MISSION® OPTICAL LIPID 3-IN-1 CHOLESTEROL METER

The **Mission® Optical Lipid 3-in-1 Cholesterol Meter** is a compact, reliable, and easy-to-use device designed to measure three key lipid profile components: Total Cholesterol (TC), High-Density Lipoprotein (HDL), and Triglycerides (TG). This system provides fast, accurate results to help individuals monitor their heart health and cholesterol levels.

KEY FEATURES:

- ✗ **Comprehensive 3-in-1 Testing:** Measures Total Cholesterol (TC), HDL, and Triglycerides (TG) in one test.
- ✗ **Fast Results:** Provides results in as little as 30 seconds.
- ✗ **Small Blood Sample:** Requires only 10 µL of blood, reducing discomfort and making it easy to test.
- ✗ **Optical Technology:** Uses advanced optical sensors for high-precision measurements.
- ✗ **Easy-to-Read Display:** Large, clear LCD display for quick and simple interpretation of results.
- ✗ **Portable & Convenient:** Lightweight and compact, making it ideal for home testing or use in clinical settings.
- ✗ **Long Battery Life:** Can perform multiple tests with a single set of batteries.
- ✗ **Memory Storage:** Stores up to 200 test results with date and time for easy tracking

TEST PARAMETERS:

Total Cholesterol (TC)
High-Density Lipoprotein (HDL)
Triglycerides (TG)

IDEAL FOR:

At-Home Cholesterol Monitoring
Healthcare Providers & Clinics
Cardiovascular Health Monitoring

MERISCREEN HIV 1-2 WB TEST CASSETTE

(WHOLE BLOOD/SERUM/PLASMA)

The **Meriscreen HIV 1-2 WB Test Cassette** is a rapid, qualitative immunoassay designed to detect the presence of HIV-1 and HIV-2 antibodies in whole blood, serum, or plasma samples. This test is ideal for screening individuals for HIV infections and is suitable for clinical settings, laboratories, and point-of-care testing.

KEY FEATURES:

- ✗ **Comprehensive HIV Detection:** Detects both HIV-1 and HIV-2 (IgM, IgG & IgA) antibodies in a single test.
- ✗ **Fast Results:** Provides accurate results within 15–20 minutes.
- ✗ **Multiple Sample Types:** Can be used with whole blood, serum, or plasma samples, offering flexibility in testing.
- ✗ **Easy-to-Use:** Simple, one-step procedure for quick and reliable results.
- ✗ **Clear Interpretation:**
 - Negative Result: One line in the control region (C).
 - Positive Result: Two lines (one in control and one in the test region).
 - Invalid Result: No line in the control region (C).
- ✗ **High Sensitivity & Specificity:** Reliable and accurate, ensuring high sensitivity and specificity for HIV antibodies.
- ✗ **Portable & Convenient:** Ideal for use in clinics, hospitals, and field settings.
- ✗ **WHO & FDA Approved:** Meets global standards for HIV testing.

IDEAL FOR:

**HIV Screening in healthcare settings | Prevention & Counseling |
Public Health Programs | Home Testing**

ORAQUICK® SALIVA HIV TEST KIT

The **OraQuick® Saliva HIV Test Kit** is a rapid, at-home HIV test designed to detect HIV-1 and HIV-2 antibodies in saliva. It provides results in 20 minutes and is ideal for individuals seeking a confidential and easy-to-use method for testing. The test is FDA-approved for over-the-counter use and is a trusted choice for HIV self-testing.

KEY FEATURES:

- ✗ **Non-Invasive Testing:** Requires only a saliva sample; no blood draw necessary.
- ✗ **Fast Results:** Provides accurate results in as little as 20 minutes.
- ✗ **FDA-Approved:** Meets FDA standards for over-the-counter home HIV testing.
- ✗ **Easy-to-Use:** Simple step-by-step instructions for straightforward testing.
- ✗ **Confidential & Private:** Offers privacy for individuals testing at home, with the option to test in a comfortable, confidential environment.
- ✗ **High Sensitivity & Accuracy:** Reliable and highly accurate results for both HIV-1 and HIV-2.
- ✗ **No Lab Processing Required:** Immediate results without the need for laboratory processing.
- ✗ **Discreet:** The test is compact and portable, making it ideal for discreet testing anywhere.

IDEAL FOR:

At-Home HIV Testing | Prevention & Education | Confidential HIV Screening

HEPATITIS B (HBsAg) TEST

The **Hepatitis B (HBsAg) Test** is a rapid diagnostic test designed to detect the presence of the Hepatitis B surface antigen (HBsAg) in a patient's blood. The detection of HBsAg indicates an active Hepatitis B infection, either acute or chronic. This test is crucial for diagnosing Hepatitis B, determining the infectivity of the individual, and guiding appropriate treatment or management decisions.

KEY FEATURES:

- ✗ **Accurate Detection:** Specifically identifies Hepatitis B surface antigen (HBsAg), which is released into the blood by the Hepatitis B virus (HBV).
- ✗ **Fast Results:** Provides results in 15-20 minutes, enabling timely diagnosis and medical intervention.
- ✗ **High Sensitivity & Specificity:** Ensures reliable and precise detection of HBsAg, even in individuals with low viral loads.
- ✗ **Small Blood Sample:** Requires only a small blood sample (from a fingerstick or venipuncture).
- ✗ **Easy to Use:** Simple, user-friendly procedure that can be used by healthcare professionals with minimal training.
- ✗ **Portable & Convenient:** Can be used in clinical settings, blood banks, or community health programs for on-site testing without the need for sophisticated laboratory equipment.

IDEAL FOR:

Hepatitis B Screening | Blood Donation Centers | Clinics & Healthcare Providers | Public Health Programs

HEPATITIS C (HCV) TEST

The **Hepatitis C (HCV) Test** is a rapid diagnostic test designed to detect the presence of antibodies to the Hepatitis C virus (HCV) in a patient's blood. The test is used to identify whether an individual has been exposed to HCV, which can lead to chronic Hepatitis C infection, liver damage, and cirrhosis if left untreated. This test is commonly used for screening, diagnosis, and monitoring Hepatitis C infections.

KEY FEATURES:

- ✗ **Accurate Detection:** Detects antibodies produced by the body in response to HCV infection.
- ✗ **Fast Results:** Provides results in 15-20 minutes, facilitating timely diagnosis and intervention.
- ✗ **High Sensitivity & Specificity:** Offers reliable and precise results, reducing the risk of false negatives or positives.
- ✗ **Easy to Use:** Simple, one-step process that requires minimal training for healthcare providers.
- ✗ **Small Blood Sample:** Requires just a small blood sample (from a fingerstick or venipuncture).
- ✗ **Portable & Convenient:** Can be used in clinics, mobile units, or point-of-care settings without the need for laboratory equipment.

IDEAL FOR:

**HCV Screening | Blood Donation Centers | Healthcare Providers |
Public Health Programs**

MALARIA P.F/PAN ANTIGEN TEST

The **Malaria P.F/Pan Antigen Test** is a rapid diagnostic test designed to detect the presence of *Plasmodium falciparum* (P.F.) and *Plasmodium* spp. (Pan) antigens in a patient's blood. It is an essential tool for the quick detection of malaria infections, especially in regions where malaria is endemic. This test is ideal for use in clinics, hospitals, and field settings to help with the timely diagnosis and treatment of malaria.

KEY FEATURES:

- ✗ **Dual Detection:** Detects both *Plasmodium falciparum* and *Plasmodium* spp. (Pan), making it suitable for the detection of different strains of malaria.
- ✗ **Fast Results:** Provides accurate results in 15-20 minutes.
- ✗ **High Sensitivity & Specificity:** Ensures reliable detection of malaria antigens, even in low parasitic loads.
- ✗ **Easy to Use:** Simple, one-step process for both healthcare professionals and point-of-care testing.
- ✗ **Convenient:** Requires a small blood sample (from a fingerstick), making it non-invasive and suitable for mass screening in endemic regions.
- ✗ **Portable:** Ideal for field use and remote locations where laboratory facilities may not be available.
- ✗ **No Need for Special Equipment:** No need for sophisticated laboratory equipment, enabling on-site testing.

IDEAL FOR:

Malaria Screening in regions with high malaria prevalence

Emergency Diagnosis of suspected malaria cases

Field Clinics & Remote Areas: Areas without access to laboratory testing

Hospitals & Healthcare Providers for quick and accurate malaria diagnosis

SYPHILIS RAPID TEST

The **Syphilis Rapid Test** is a quick diagnostic test designed to detect the presence of antibodies to the bacterium *Treponema pallidum*, which causes syphilis. This test is essential for diagnosing syphilis infections, especially in individuals who may not show visible symptoms but are still contagious. It is often used for screening and early detection of syphilis in clinical, hospital, and community health settings.

KEY FEATURES:

- ✗ **Accurate Detection:** Detects antibodies specific to *Treponema pallidum*, the bacterium responsible for syphilis.
- ✗ **Fast Results:** Provides results in as little as 15-20 minutes, enabling quick diagnosis and treatment.
- ✗ **High Sensitivity & Specificity:** Offers reliable and precise results, reducing the likelihood of false positives or negatives.
- ✗ **Small Blood Sample:** Requires only a small blood sample (usually obtained from a fingerstick or venipuncture).
- ✗ **Easy to Use:** A simple and user-friendly process that can be administered by healthcare professionals with minimal training.
- ✗ **Portable & Convenient:** Can be used in point-of-care settings such as clinics, health camps, and mobile units.
- ✗ **No Laboratory Equipment Required:** Ideal for on-site testing and screening without the need for specialized lab facilities.

IDEAL FOR:

**Syphilis Screening | Blood Donation Centers | Healthcare Providers |
Public Health Programs**

BOSON COVID-19 ANTIGEN TEST KIT

The **Boson COVID-19 Antigen Test Kit** is a rapid diagnostic test designed for the detection of the SARS-CoV-2 virus, responsible for COVID-19. This self-test kit allows for quick and accurate testing to identify whether someone is infected with the virus. It provides results in just 15 minutes, making it ideal for both home use and point-of-care testing in healthcare settings.

KEY FEATURES:

- ✗ **Fast & Accurate Results:** Provides results in 15 minutes with high accuracy.
- ✗ **Easy to Use:** Simple step-by-step process for at-home or clinic use.
- ✗ **Sample Type:** Nasal swab sample collection, making it non-invasive and user-friendly.
- ✗ **FDA & CE Approved:** Meets global standards for rapid antigen testing.
- ✗ **Portable & Convenient:** Ideal for home testing, schools, offices, and travel purposes.
- ✗ **Cost-Effective:** An affordable alternative for COVID-19 screening and large-scale testing.
- ✗ **Reliable Detection:** Detects the presence of SARS-CoV-2 antigens, providing quick results that help determine the likelihood of infection.

IDEAL FOR:

At-Home Testing for COVID-19 detection

Workplace Screening and educational institutions

Travel Testing: For requirements to travel or attend events

Public Health Surveillance in community settings

The Boson COVID-19 Antigen Test Kit offers a convenient, accurate, and fast method for detecting COVID-19, providing users with the ability to take quick action in response to a potential infection.

PREGNANCY MIDSTREAM TEST AND TEST STRIP

The **Pregnancy Midstream Test and Pregnancy Test Strip** are both rapid diagnostic tests used to detect the presence of the hormone human chorionic gonadotropin (hCG) in a woman's urine. This hormone is produced when a fertilized egg attaches to the uterine lining, confirming pregnancy. Both test formats provide a quick, accurate, and easy way to determine pregnancy status, with the difference mainly in the method of sample collection.

KEY FEATURES (For Both Midstream & Test Strip):

- ✗ **Accurate Detection:** Detects hCG, the pregnancy hormone, even at low levels, making it possible to detect pregnancy early.
- ✗ **Quick Results:** Results in 3-5 minutes, enabling fast confirmation of pregnancy.
- ✗ **High Sensitivity:** Both the midstream test and test strip are designed for high sensitivity, detecting pregnancy as early as 7-10 days after conception.
- ✗ **Easy to Use:** Simple procedures that require minimal training.
- ✗ **Small Sample Size:** Requires just a small urine sample, making the test easy and convenient.

PREGNANCY MIDSTREAM TEST:

The Pregnancy Midstream Test is a type of test where the urine sample is collected directly by urinating on the test stick. It is often preferred due to its clean, easy-to-use design and no need for a collection cup.

PREGNANCY TEST STRIP:

The Pregnancy Test Strip involves dipping the strip into a urine sample collected in a clean container. This format is compact, affordable, and often preferred for home use.

MEDICAL CONSUMABLES

PERSONAL PROTECTIVE EQUIPMENT (PPE):

Nitrile Examination Gloves

Face Masks

Thermometer

Disinfectant

Condoms

Alcohol Swabs

Plasters

Cotton Wool

Lancets

DIAGNOSTIC & TESTING SUPPLIES:

Blood Pressure Cuffs
Thermometers (Digital, Infrared)
Stethoscopes
Pulse Oximeters

WOUND CARE & DRESSING:

Adhesive Bandages (Plasters)	Medical Sponges
Sterile Gauze Pads	Cotton Rolls
Adhesive Tapes (Medical, Surgical)	Sterile Gloves
Sterile Wound Dressings	Wound Cleansers (Antiseptic)
Burn Dressings	Sterile Sutures
Cotton Wool Balls & Swabs	Sterile Needles & Syringes
Hydrocolloid Dressings	

SURGICAL INSTRUMENTS & SUPPLIES:

Surgical Scalpels	Suture Materials
Surgical Scissors	Surgical Blades
Forceps	Surgical Sponges
Surgical Drapes	Surgical Masks
Surgical Needles	Cotton Balls (Sterile)

INJECTIONS & INFUSION PRODUCTS:

Syringes	Needle Guards
IV Catheters & Tubing	IV Fluids
Insulin Needles	Heparin Flush
Infusion Sets	Intravenous Infusion Pumps
Vial Stoppers	

STERILIZATION & INFECTION CONTROL:

Alcohol Swabs	Hand Sanitizers
Disinfectant Wipes & Sprays	Disinfectant Solutions
Autoclave Bags	Sterilization Indicators
Sterilization Pouches	

DIAGNOSTIC IMAGING & LABORATORY:

X-ray Film	Microscope Slides & Cover Slips
Blood Collection Tubes (Vacutainer)	Petri Dishes
Urine Sample Collection Cups	Laboratory Pipettes
Sterile Specimen Cups	Swabs (Sterile)

RESPIRATORY CARE:

Oxygen Masks	CPAP/BiPAP Machines
Oxygen Tubing	Nasal Cannulas
Nebulizers	Ventilator Filters
Inhalers (MDIs, Dry Powder)	Pulse Oximeters

INJECTABLES & IV SUPPLIES:

Intravenous Cannulas
IV Set Infusion Kits
Intramuscular Syringes
Subcutaneous Injection Supplies
Needles (Various Sizes)
IV Fluid Bags (Saline, Dextrose, etc.)

WASTE DISPOSAL SUPPLIES:

Sharps Containers
Biohazard Bags
Clinical Waste Bags
Waste Disposal Bins

MONITORING EQUIPMENT:

ECG Electrodes	Thermometers
EEG Electrodes	Pulse Oximeters
Blood Pressure Monitors	Fetal Doppler
Heart Rate Monitors	

URINARY SUPPLIES:

Urinary Catheters (Foley, Intermittent)
Urostomy Bags
Urine Collection Bags
Bedpans & Urinals
Commode Liners

MISCELLANEOUS MEDICAL SUPPLIES:

Thermal Ice Packs
Hot/Cold Compresses
Elastic Bandages
Knee/Ankle Supports
Finger Splints
Thermoplastic Splints
TENS Units (Transcutaneous Electrical Nerve Stimulation)

FIRST AID SUPPLIES:

First Aid Kits
Burn Creams & Gels
Antiseptic Creams
Antibiotic Ointments
Alcohol Wipes
Sterile Bandages
Adhesive Strips & Tapes
